## LETTERS OF TESTIMONIALS

On January 2, we begin our sixth year of success. This progress is due to your friendliness in sending us a good share of your orders.

We will continue with every effort and means at our command, to merit your further confidence.

This catalog was laid out with the thought of making it easy to read and quick to find any special item. It lists practically everything you may need in your greenhouse or shop. Please keep it in a handy place, after you've sent us your present order.

1950 promises to be better for florists. Get ready now for a good Spring business.

Extending you all the best wishes from our staff and myself  
for a Prosperous New Year.

Cordially,

RAYMOND A. FLECK,  
*President and Treasurer*

Extracts from a few of the many letters we receive throughout the year:

# Antirrhinum

## ALL THE BEST—Greenhouse Forcing "SNAPS"

### Originator's Packets

The Rockwood strains offered here are known for their well-formed flowers, with large, closely set florets, heavy, wiry stems. Excellent varieties for ground beds. Medium tall in raised beds. Greenhouse produced seeds under ideal conditions. Ask for single stem culture pamphlet and year-round production.

**Special Note**—Seed should be sown late June or July for Winter flowering in Northern States. Late July or early August in Southern States. High temperatures retard germination. Select a cool location for the seed flats where there is good air circulation. Water sparingly but keep moist, until seedlings are well established. We recommend using sterilized soil and it should not be fertilized. Dust seeds with Proliferol or Hormo-Root before sowing.

## ERIKSSON'S PRIMULA MALACOIDES

### Originator's Packets Only

**Glory of Riverside Improved.** True rose-pink, a strong grower, and without a doubt the most valuable variety for all purposes.

**New Giant.** Color closely resembles Glory of Riverside but it has heavier stems and larger flowers. It is a late bloomer, thus assuring the grower of a longer season.

**White Giant.** An exceptionally strong grower and well adapted for combinations.

**Lilac Beauty.** A pure soft lilac which is absolutely fixed. Another fine color for make-up work.

**Peach Blossom.** Deep Peach blossom pink. Compact habit. Excellent keeper.

**Mrs. Eriksson of Riverside.** A glowing rose-red, a very strong grower with heavy flower stems and stiff foliage; large flowers in heavy clusters of medium height.

**Pure White Improved.** Flowers are smaller than White Giant but more abundant. Good for make-up work.

**Lavender New Baby Improved.** Not absolutely fixed so that some flowers are lavender pink. This variety contains the most beautiful shades of lavender.

**Red New Baby Improved.** An outstanding glowing red. Large-flowered, heavy producer on strong stems. Better than Brilliancy which has a toxic effect on some people.

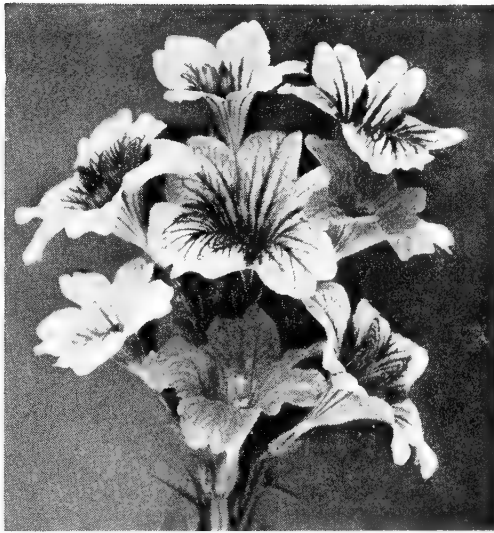

**Mixture of Above.**

# Fleck's Sweet Peas

## LATE or SUMMER FLOWERING VARIETIES

The original strong growing class largely used for Summer flowering. Profitable for outdoor cuttings by sowing not later than February 1st, placing 3 or 4 seedlings in a 3-inch pot and after hardening them in an outdoor frame, planting them out. Space rows 3 feet, the pot plants spaced about 8 inches, but before doing so, syringe and fumigate very thoroughly, being sure they are clean of aphids. They should be sprayed for aphids every 2 weeks until they flower. Failures are frequently due to not watching this point. Usually reach a height of 4-5 feet and are supported with wire and string as indoors. Water should be applied when necessary. Flowers freely the last two weeks of June on. The new Spring flowering class are also well suited for outdoor growing.

### BLUE SHADES

**Windsor Blue.** Clear mid-blue, large flowers, heavy stems.

**NOTE**—On important items, we have noted the approximate number of seeds per ounce which may be helpful in ordering. For example: **Sweet Peas**—350 S means 350 seeds per ounce. However, this does not mean that you will get that many plants. Under favorable germinating conditions, most large seeds may germinate fifty to sixty per cent.

Nature in seeds is just the same as in people—no two exactly alike. Some items like *Centaurea Candidissima*, never germinate better than 20 to 30%. Common *Petunias* or *Marigolds* 80 to 95%. Yet, within the same group there may be a few as low as 60% from same years' crop.

A good many growers consider it best to order *at least* double the quantity of seeds for the plants they desire. It is good business to have more seedlings than needed, rather than to be short. The cost of seed is little compared to other considerations.

# Perennial Seeds for Florists

## AND POPULAR BIENNIALS

Every florist who has the available space should grow Perennials. Some are as easily raised as Annuals; quite a few may be forced; some make fine pot plants, and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to Perennials of all kinds. They require little heat, if any, and not much care.

# PERENNIAL SEEDS FOR FLORISTS

**Delphinium, Pacific Giants**

## DELPHINIUM 10,000 S

Early Spring sowing will produce nice, large clumps by Fall for sales or greenhouse forcing. January sowing will produce flowers during Summer. July and August sowing and transplanting into the field during Fall will produce an early crop of fine large spikes.

Sow from January to September in flats. Use light, sandy soil, cover seed very slightly, keep moist and shaded until germination starts. Gradually give more light and fresh air, later transplant into flats and when large enough, harden off in full sun before planting out. Rich soil, good drainage and sunny location are essential.

### Roses

#### For Easter and Spring Sales

For Easter blooming, pot them six weeks before. When Easter is late, five weeks is sufficient. After well started, give them a little feed and plenty of water.

Important is the quality. Heavily caned, liberally graded and shaped beautifully because of the culture and field room that they have had.

Important too, is the fact that they are sold only to florists. We do not compete for your retail sales.

Fill a range, a house, a bench, or a counter display, and these well grown Roses will really pay.

You may order by color instead of variety, if so desired.

## DESCRIPTIONS OF NEW VARIETIES FOR 1950

### PRISTINE - Oct. 20

Early, intermediate pure white Pompon. Responds with fire for July and August flowering. At its best when period from pinch to shade does not exceed 28 days. Does not spot. The best white for the earliest shadings in the cloth house.

### POPCORN - Oct. 25

Intermediate white Pompon, flowering with Pinocchio. Outstanding white cloth house variety. Responds with Gold Coast. Has consistently outproduced all other varieties. The flower is completely double. Very resistant foliage. Clean, upright growth habit.

### STARBRIGHT - Oct. 25

Early intermediate golden yellow Single. Excellent for the cloth house.

### BALLERINA - Nov. 1

Intermediate pink Single. Early cloth house variety. Better form and color than October Pink and has a more upright growth habit. Best with some disbudding. Resistant to Verticillium.

### QUEEN'S LACE - Nov. 1

Early white Spider. Responds with Silver Sheen. It should receive the same cultural treatment, spacing, etc., as Silver Sheen. A very durable flower. Has been very much in demand for June weddings this past season.

### BUTTERSCOTCH - Nov. 5

Intermediate golden bronze Pompon with same season as Cassandra but with an improved growth habit.

### ENCORE - Nov. 5

Intermediate pure white Pompon to flower with Little America and Sea Gull in the shading program. A more satisfactory variety than Vesper and is excellent for late September and October in the cloth house.

### RUBICON - Nov. 5

Early bronze red Decorative to flower with Mary McArthur in July, August and early September. Superior color to Seneca and Red Rust during the Summer period.

### GOLDEN CHORD - Nov. 10

Intermediate golden yellow Pompon. The variety ranks with Gold Coast and Sunnyside.

### SAMOVAR - Nov. 10

Rosewood bronze Decorative flowering at the same time as Red Rust both natural and in the shading program. A good variety for September and October flowering.

### FORTY-NINER - Nov. 15

High quality yellow round Pompon. A very satisfactory cloth house variety.

### MOONGLOW - Nov. 15

Intermediate white Pompon. Its natural season follows that of Vesper and finishes just ahead of Seafoam and Priscilla.

### SOPRANO - Nov. 15

Intermediate pink single to follow Ballerina in both the shading program and natural season.

### BOURBON - Nov. 20

Intermediate rust bronze Single. Very good form and substance. Flowering group with Goldsmith, Cameo and Omega.

### FESTIVAL - Nov. 25

Small red Single for Thanksgiving. The earliest of a group of outstanding red Singles in which the growth habit and production is greatly improved.

### CRYSTAL BEAUTY - Nov. 28

A large, solid, pure white Pompon with general all-round perfection. Good sprays on strong petioles. Stem tall and vigorous.

### CHAMPAGNE - Dec. 1

Intermediate yellow Single. A freer grower than Lodestar.

### GOLDEN HARVEST - Dec. 1

Deep gold, small Pompon. Has excellent growth and substance. A fine productive variety which keeps exceedingly well on the plant or after being cut.

### CINDERELLA - Dec. 5

Intermediate yellow, Single-flowering in Yellow Cameo season. No tendency to blindness. Crowns readily, producing well on compound sprays.

### GALAXY - Dec. 5

Intermediate bronze Single. Same season as Viking and Cavalcade, with an improved growth habit.

### SILVERSMITH - Dec. 10

Large, very pure white Decorative, immediately following Cameo. Strong, free growth with no tendency toward blindness.

### SNOWCREST - Dec. 12

An intermediate, solid white Pompon with a green, immature center, full, rounded form and excellent substance. A fine and nice growing variety.

### HOLIDAY - Dec. 15

Intermediate wide-petaled red Single flowering for Christmas. Freer growth habit than Sarong.

### SNOWCAP - Dec. 15

Intermediate formal type white Pompon for Christmas

### DEFIANCE - Dec. 20

Large, glowing, true orchid pink Pompon of decorative type with a green, immature center, making a very pleasing color. Excellent growth and good production.

### MERRYMAKER - Dec. 20

Crimson red Single for the holiday season. A little larger and a better flower form than Christmas Star.

# Insecticides, Fumigants, Fungicides, Damping Controls, Etc.

*For Every Purpose in Greenhouse and Outdoors*

Since florists must use insecticides, many of them harmful, we strongly recommend the use of masks and goggles in the greenhouse and to be careful not to get any dusts or solutions on hands with open cuts, etc. Your health is of first importance. And store them out of reach of children. Many florists are careless in this regard. „An ounce of prevention is worth a pound of cure.” Full directions on all packages.
